DETAILED ACTION

Allowable Subject Matter

1. Claims 1-28 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner agrees with the applicant that the combination of limitations is novel.
3. The system regards control software on a network access and monitoring system, utilized by a network administrator, assigns and changes forwarding cost values for selected paths between neighboring nodes, i.e. a router and a neighboring router or other component. More specifically, the control software assigns two or more cost values for a single path between network nodes, each cost value independent of the others assigned on a particular path, and associated with a specific destination, enabling load balancing of data. Claims 8 and 24 add that such values are reported to neighboring nodes to aid in altering data traffic routes to a specific destination.
4. In the area of load balancing, no art is known that teaches a forwarding cost definition and assignment method that matches the above combination, nor is there sufficient motivation to modify the art to do so. Therefore, the combination is novel and non-obvious.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 2145

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard further background on load balancing and forwarding cost assignment techniques.
